

**Maroos**

Shipping & Forwarding Company

## Technical Management

Our competent and experienced technical team provides science support services and general use equipment for the operation of vessels which composed the following functions:

- Technical Supervision
- Vessel Inspection Reports
- Vessel Performance Monitoring
- Dry dock Repairs
- Budgetary & Financial Control
- Planned Maintenance Systems
- Supplying Technical Advice to Owners
- Purchasing & Inventory control
- Insurance Placement & Claims Handling

Maroos will ensure that all operated vessels comply with statutory requirements, as well as port state, flag state and classification requirements including maintenance. The team plans, monitors and attends any major repair work whilst the vessel is in dry dock.
