

Maroos

Shipping & Forwarding Company

Tug and Barge Operations

Maroos's tug and barge fleet ranges from 750 hp - 8000 hp tugs and 1200 dwt - 8000 dwt barges. Tugs and barges transport all types of cargo often to remote areas with little infrastructure. Barges are also used for lighterage and general cargo.

Maroos's Tugs, apart from towing barges, are often involved in berthing/canal transiting assistance and towing third party equipment
